---

## EXPERIENCE

---

### TOTALMOBILE, JUNIOR DEVELOPER, (APRIL 2023 - FEBRUARY 2025)

Totalmobile is a market leader in field service and mobile workforce management technology. Their mission is to help organisations deliver excellent services while reducing costs through a suite of rostering, scheduling, job management and business analytics solutions.

#### My Role

Developed and maintained features for the company's flagship product, Connect, focusing on new functionality, bug fixes, and technical debt reduction. Collaborated on testing and debugging to ensure product stability and performance.

### DYNEX SEMICONDUCTORS, SOFTWARE ENGINEER, (SEPTEMBER 2021 - APRIL 2023)

Dynex is built on the principle of obtaining the best possible outcome in the least wasteful manner by challenging energy efficiency standards in power electronic systems and making a positive difference to our customers and our environment.

#### My Role

Contributed to the development and maintenance of internal systems, primarily working with the C#-based Epicor platform. Assisted in building a bespoke label printing solution for production line automation, leveraging software development expertise to improve operational efficiency.

### ORISEL LIMITED WEB DESIGNER/DEVELOPER, (JULY 2017 – SEPTEMBER 2021)

We are a digital marketing agency working with ambitious business owners on cutting edge marketing strategy, digital sales funnels and automated customer experiences to explode sales.

#### My Role

Designed and developed bespoke web solutions for small and large businesses, with a focus on e-commerce platforms. Provided end-to-end support, from initial concept to deployment, including email marketing integration and client guidance throughout the development process.
